

ESTIMATOR/PROJECT ENGINEER

The Brunalli Construction Company, a heavy-highway contractor with an emphasis on bridge construction located in Southington, CT, is seeking an experienced Estimator/Project Engineer.

The responsibilities of this position include bid preparations which entail analysis of bid documents, take-offs, costing, procurement of quotes from subcontractors and suppliers, scope review and final reviews prior to bid submission. This position also includes carrying out various engineering requirements for active projects. Requirements for this position include 5 or more years' experience in the above disciplines and a BS degree in construction management or civil engineering.

Applicants with a current Professional Engineer's license are preferred. Experience as a project manager in addition to estimating/engineering experience will be considered a positive.
