

AGC's Lean Construction Education Program

UNIT 2: PULL IN PRODUCTION

WEDNESDAY, FEBRUARY 26, 2020 | 12:30 PM – 4:30 PM

Lean Construction challenges project stakeholders to develop and apply better ways to manage the overall construction process.

Unit 2: Pull in Production is a half-day course that introduces the concept of *pull* as a means to reliable workflow. In the construction process, our work is all connected and variation in even one of those processes affects us all.

This course provides tools to help participants recognize sources of variation on their own projects, examine variation's effect on operations, and mitigate the effects of variation in their every-day work.

Following completion of this course, participants will have the ability to:

- Compare batch-and-queue and continuous-flow production systems;
- Distinguish push systems from pull systems;
- Describe the impact of pull on production systems;
- Explain pull strategies in construction operations.

Date: Wednesday, February 26, 12:30 pm – 4:30 pm
Location: CCIA, 912 Silas Deane Highway, Suite 112, Wethersfield, CT 06109
Instructor: Colin Milberg, ASKM & Associates

An Associated General Contractors of America (AGC) Education Program

About AGC's LEAN Construction Education Program

To develop the tools needed to build lean, the Associated General Contractors of America (AGC) has developed the Lean Construction Education Program. Construction professionals at all experience levels will learn the building blocks necessary to transform their projects and companies into a lean operating system.

AGC's Lean Construction Education Program is a series of courses that progressively cover a range of topics essential to Lean Construction, including:

- Variation and pull in production
- Lean workstructuring, supply chains, and assembly
- Production management
- Management by values
- Problem-solving principles and tools
