

Project Engineer- Building Group

The Project Engineer will oversee all incoming and outgoing information and document controls related to the development and completion of a construction project. Will support the Project Manager and Project Superintendent to help ensure project, team, owner, and business partner success. This includes but not limited to the jobsite communications, RFI process and project control procedures to include scheduling and changes in the work. The ideal candidate(s) will also actively participate in and manage information from contractor meetings and strengthen positive interactions with contractors.

Qualifications

Computer knowledge in Contract Management software is required as well as the ability to execute and supervise the submittal process consistent with the requirements of the Project Schedule, RFI's, document control and project closeout.

Qualified candidates will have a Bachelor's Degree in Engineering, Construction Management or other construction related field and a strong dedication to Safety including OSHA 10/30 training. We will consider candidates with business degrees including econ majors who have an interest in construction management.

O&G Industries is an Equal Employment Opportunity/Affirmative Action Employer that recruits qualified applicants and advances in employment without regard to race, color, religion, age, gender, gender identity, gender expression, sexual orientation, ethnic or national origin, genetic information, disability, marital status, veteran status or any other status protected by applicable federal, state, or local laws. O&G Industries also prohibits harassment and/or retaliation of applicants and employees based on any of these protected categories.
