

THE CCIA SAFETY COMMITTEE Safety Roundtable

Tuesday, April 11, 2023

This month, **Brian Ritter, Safety Specialist, of Milwaukee Tool** joins us to discuss **Safety Technology and Ergonomics**. Musculoskeletal Disorders (MSDs) account for over 33% of all lost time injuries, resulting in 400K injuries. These MSDs are some of the hardest types of injuries to manage in the construction industry. Addressing these injuries requires collaboration with manufacturing partners to not only build the most ergonomically based products, but also to study how to reduce these type of injuries. Addressing the hazard of MSDs, in 2016, Milwaukee Tool launched a state-of-the-art Ergonomics testing and evaluation center where they conduct ergonomics testing on tools through human user EMG screens, muscle fatigue rates, increase risk for maximal contraction, and elevated risk for injury.

Topic: Safety Technology and Ergonomics

Upcoming Meetings/Events

- Tuesday, May 9, 2023
Safety Roundtable
- Tuesday, June 13, 2023
Safety Roundtable
- Tuesday, September 12, 2023
Safety Alliance Conference
- Tuesday, October 10, 2023
Safety Roundtable
- Tuesday, November 14, 2023
Safety Roundtable
